13 September 2019

Weekly Focus

Norges Bank set to hike, Fed set to cut

Market movers ahead

- We expect Norges Bank to hike its policy rate by 25bp to 1.50% on Thursday and believe that the rate path will be flattened. We expect the new rate path to suggest unchanged rates after Thursday but believe that a hike is more likely than a cut.
- In Sweden, we expect the **Riksbank minutes** to show that there has been significant disagreement within the Executive Board.
- On Wednesday, we expect **the Fed** to cut by 25bp without pre-committing to more cuts.
- We do not expect either the Bank of Japan or the Bank of England to change its monetary policy stance next week.
- Watch out for low-level trade talks between the US and China ahead of the formal meeting in early October.
- On Tuesday, the UK Supreme Court hearing on whether Prime Minister Boris
 Johnson's prorogation of Parliament was unlawful begins (it is not clear whether the
 ruling will also be on Tuesday). In our view, the ruling will not be a game changer for
 Brexit.

Weekly wrap-up

- The ECB cut the deposit rate by 10bp to -0.5% and restarted QE by EUR20bn per month (open-ended).
- The probability of a no-deal Brexit has declined.
- We are seeing more positive signs in the trade war but the hurdles to reach a deal have not changed.
- We keep our EUR/USD forecast of 1.10 in 1-3M.

Market movers

Global

- In the US, we have a quiet week in terms of data releases. However, Wednesday brings the FOMC meeting and rate decision. As repeated at the last FOMC meeting, the Fed 'will act as appropriate to sustain the expansion' and we think the Fed will deliver on its promise. Our view is that the Fed will cut rates by 25bp, as two out of the three important factors explaining the July cut (higher (trade) uncertainty, slower global growth and subdued inflation) have worsened since then (Trump escalated the trade war and data out of China and Europe have disappointed). While we do not think the Fed will pre-commit to further easing (although it will repeat its easing bias), we still expect four more cuts after the one next week, taking the target range to 0.75-1.00% at the March meeting. The trade war is an important risk to our outlook in both directions, but a global slowdown poses risks as well. For more details, see FOMC Preview Another Fed cut without pre-committing to further easing, 13 September.
- In the **euro area**, the focus next week is on Tuesday's <u>ZEW sentiment index</u> from both Germany and the euro area. Last month, investors' expectations of the economy plunged to a level similar to the beginning of 2008. However, the assessment of the current situation in the euro area is not in a free fall anymore and this month's Sentix indicator actually showed a rebound for the euro area. Hence, we see scope for a small rebound in the euro area expectations but see further downside risks to the German print due to the still dim growth outlook.
- In the **UK**, the focus is on <u>Brexit</u>. While Parliament is currently 'prorogued' (suspended/sent home), that may change on Tuesday when the <u>Supreme Court starts its hearing on</u> whether the prorogation was unlawful or not (it is a bit unclear whether the ruling will also be given on Tuesday or whether the hearing will take a few days). Our guess is that the Supreme court will rule it was not unlawful (in line with the ruling from the High Court in England and Wales but against the ruling in Scotland). The ruling will likely cause a lot of political noise no matter what, but in reality we doubt it will be very important for the Brexit outcome (whenever that comes).

We do not expect <u>Bank of England</u> to change its monetary policy at its meeting on Thursday. The Bank of England is caught in the middle of a combination of a tight labour market, higher wage growth, high Brexit uncertainty, trade war uncertainty and slower global growth.

• In China the focus remains on the <u>trade war</u> where we saw some positive gestures from both sides over the past week ahead of the high-level talks in early October. There will be lower-level preparations for the talks in September, which could lead to some comments from US and China ahead of the important negotiations in October. We believe both sides will aim to create a good atmosphere so would mostly expect positive comments. The actual talks will be difficult, though, in our view.

Source: Federal Reserve, Macrobond Financial

On the data front it is time for the batch of industrial production, retail sales and fixed asset investments, which are always released on the same day. We expect to see some rebound in <u>industrial production</u> after a quite weak print last month. While growth is under pressure, there is no sign of a hard landing when we look at a broad range of indicators, see *China Leading Indicators: Weakness but still not a hard landing*, 12 September 2019. <u>Retail sales</u> is expected to hover around 8% as it has done since November last year. On Friday, the new benchmark lending rate (Loan Prime Rate) is expected to decline slightly from the current level of 4.85%.

• In Japan, the most important event is the <u>Bank of Japan's policy meeting</u> ending on Thursday. We expect no changes to the 'QQE with yield curve control' policy. However, the struggling global economy and the October VAT hike are threatening to send Japan back into deflation mode, so the likelihood of action later this year has risen. Look out for our preview published on Monday.

On Wednesday, we also get August <u>export figures</u> – a relevant indicator of the global slowdown's effect on Japan. A strong yen is currently a headwind to exporters. The strong yen is a challenge for the BoJ's inflation target as well. We get fresh August <u>CPI inflation figures</u> on Friday.

Scandi

In Denmark, the week kicks off with Finance Denmark's housing statistics for Q2, which will give us the figures for house price growth at a municipal level. House prices have grown strongly this year, while apartment prices have trended more modestly higher. Apartment project sales have declined sharply this year, which may also be reflected in the new figures.

<u>Consumer confidence</u> is due on Friday. We are looking for a slight decline to 5, following last month's leap to 6.3. That would probably be too high for this month, as household expectations on the future course of the Danish economy will likely continue to pull lower.

In Sweden, the Riksbank minutes are likely to show that there has been significant disagreement within the Executive Board about the shape of the repo rate forecast and that the surprising flattening of the path was the result of a compromise. Arguably, Per Jansson, as the most dovish member, has seen weakening global and domestic data, easing signals from both the Fed and the ECB and global bonds yields plunging into the negative this summer as signs that the next step for the Riksbank is to postpone rate hikes of even prepare to cut rates again. At the opposite end we have Henry Ohlsson and Martin Flodén who have both been at the forefront of raising rates. Ohlsson has probably continued to argue that the economy and labour market are strong and inflation and inflation expectations close to target. Flodén may have been more concerned about the SEK weakness. We believe a middle way between an unchanged repo path and a postponed one was the flatter. The discussion should be put into the context that this week we saw all measures of August inflation being 0.2pp below forecast and Prospera's broad-based quarterly inflation expectations falling again on all horizons.

<u>Unemployment data</u> for the past couple of months have been quite awful. Other job-market data confirm that labour market conditions are cooling down. Employment has turned down, overtime hours are plunging and vacancies are falling. Having said that,

one should also keep in mind that summer months are volatile and subject to uncertainty. In seasonally adjusted terms, unemployment has spiked from 6% in April to 7.1% in July. Honestly speaking, this looks somewhat exaggerated. Therefore we would guess that it may be time for a correction. Given the fact that seasonally adjusted numbers are also very volatile a forecast is really a matter of informed guessing. Nevertheless we are looking for a decline in unemployment (s.a.) from 7.1% to 6.8% but would not be too surprised to see a somewhat bigger correction. On the back of this, we are looking for a drop in unadjusted unemployment from 6.9% to 6.3%. A smaller – or no – correction downwards in unemployment would really be astonishing. The continued rise in PES newly registered unemployed actually suggests just that.

• In Norway, it will be the most exciting <u>rate-setting meeting</u> for some time. In June, Norges Bank signalled that its policy rate would probably go up again in September. While global risks have very clearly been mounting, there are still no signs of this producing increased uncertainty in the Norwegian economy. Growth is still above trend, the labour market is tightening, and wage growth is climbing slightly faster than expected. The krone is also much weaker, and the price of oil only marginally lower, than projected in the previous monetary policy report. We therefore reckon that Norges Bank will raise its key rate by 25bp to 1.50% on Thursday, with the new money policy report showing interest rates more likely to rise than fall next year.

Weekly Wrap-Up

Open-ended QE and a tiering system

Main macro themes

- The ECB cut the deposit rate by 10bp to -50bp, leaving the MRO and MLF unchanged, while also linking it to the inflation outlook. In addition, the ECB restarted QE by EUR20bn per month with an open end, which was a strong commitment, but a very vocal call from Mario Draghi indicated a need for fiscal policies to take the stage now. Given the much-clouded environment and the need to gauge the market impact of the tiered deposit system on money-market rates, we do not expect the ECB to change policy rates at the current juncture. However, if further monetary easing is needed, it will come via a rate cut and not further QE. See also ECB Research: Open-ended QE and tiering. Now, over to you, fiscal policies, 12 September 2019, and ECB Research: Understanding ECB's tiering system, 13 September 2019.
- The probability of a no-deal Brexit diminished this week as Parliament passed the 'no-deal legislation' and made it into law. The law states that the government must ask the EU for a Brexit extension if no agreement is reached with the EU by 19 October. The Parliament has now been prorogued (sent home) and will return 14 October (unless the Supreme Court says otherwise next week). It still points to a new election after 31 October, as Johnson does not have a majority in Parliament. See also Brexit Monitor: Opposition unlikely to support snap election ahead of prorogation, 9 September 2019.
- On the US-China trade war, Trump's tariff delay improves conditions for October trade
 talks, but the hurdles to reach a trade deal remain. Chinese stocks rallied again on easing
 trade tensions and policy stimulus. USD/CNY stabilised just above 7.10. We expect it
 to stay here for some time. PPI moves further into deflation territory but does not signal
 a hard landing. A cut in the RRR rate signals more efforts to sustain growth at a
 minimum of 6.0%.
- In Norway, the Regional Network Survey confirmed that mainland growth prospects remain strong (at 2.7% annualised growth over the next 6M), that the Norwegian economy is fairly insulated against weaker global growth impulses and that capacity problems are on the rise. Unlike the markets, we expect Norges Bank to hike policy rates by 25bp on 19 September.

Financial market developments

- In the medium term, we think that the ECB regained some credibility with its strong
 forward guidance, which makes EUR a more two-sided bet. We keep our forecast on
 1-3M of 1.10. The Fed meets next week. We look for a 25bp cut in line with market
 expectations, but likely no strong pre-commitment to further easing, which could weigh
 on EUR/USD.
- After the recent sell-off in the European fixed income space going into the ECB meeting, the ECB meeting was very dramatic. Looking beyond the near future, the ECB and Draghi are sending a strong message that rates are 'low for a very long' time as well as an open-ended QE, such that the ECB could be stuck with a QE programme 'for infinity' as market participants describe it. Attention will now turn to the inflation market to see if the 5bp jump yesterday will persist in the near future.

Scandi update

Denmark - Greater effective rate cut than ECB

Danmarks Nationalbank cut its benchmark rate from -0.65% to -0.75% in connection with the ECB's rate cut on 12 September. Effectively, this is a greater rate cut than the ECB's, as the ECB also introduced a system whereby banks can have some of their money deposited at 0% - a system that Danmarks Nationalbank already had in place. Given that the Danish krone (DKK) is already relatively weak, it will be interesting to see whether this rate reduction will squeeze the DKK further.

Inflation was unchanged at 0.4% in August – slightly lower than we had expected and largely due to food and petrol prices declining by more than anticipated. Several temporary factors are also providing considerable negative input to inflation at the moment. Vacation home rentals are pulling inflation lower, but this will evaporate when the season ends in September. Electricity prices are also pulling lower, in part because the market price has dropped and also because the PSO levy has fallen to zero, though this could very well rise again in Q4.

Exports rose 3.8% m/m in July following weak figures in June. Medical and machinery exports were the main driving force, which has also been the case for most of this year. Hence, exports continue to look strong, and are up 7.1% since December.

Sweden - August data a blow to Riksbank

All three measures of inflation – i.e. CPI, target CPIF and core CPIF excl. Energy – were 0.2pp below the Riksbank's new forecasts. Furthermore, they were all well below the 2% target. Needless to say, that was hardly what the Riksbank wanted. But there was more bad news. Prospera's 'big' (several sectors including Social Partners) quarterly survey showed that inflation expectations declined in the manner set out by monthly money market players' expectations. Moreover, Social Partners wage expectations dropped on the 1- and 2-year horizons, contrary to the Riksbank's wage forecast in the MPR. We expect these trends to continue, eventually resulting in a rate cut next year.

Norway - further solid growth ahead

Norges Bank's regional network is now signalling slightly weaker growth than last time around. The aggregated output index nevertheless points to annual growth in the mainland economy of around 2.7% over the next six months, which is still well over the Norwegian 'speed limit' and indicates that pressures in the economy are set to mount. There are also clear signs of capacity utilisation starting to hit high levels in some industries. It is particularly important that few firms are reporting that uncertainty about the US-China trade war or Brexit is affecting their employment or investment plans.

Latest research from Danske Bank

13/9 China Weekly Letter - Signs of goodwill and interim deal now in play

Trump's tariff delay improves conditions for October trade talks, but the hurdles to reach a trade deal remain.

13/9 ECB Research - Understanding ECB's tiering system

Weekly Focus

At the meeting yesterday, the ECB announced a tiering system for reserve remuneration (starting 30 October 2019) to support the bank-based transmission of monetary policy.

13/9 FOMC Preview - Another Fed cut without pre-committing to further easing

We expect the Fed to cut again next week in line with market pricing.

12/9 Flash: ECB Research - Open-ended QE and tiering. Now, over to you, fiscal policies

The ECB cut the deposit rate by 10bp to -50bp, leaving the MRO and MLF unchanged, while also linking it to the inflation outlook.

12/9 Flash Comment Denmark - Back at record-low policy rate of -0.75%

Danmarks Nationalbank today cut its key policy rate by 10bp to minus 0.75%.

12/9 Bank of Japan Preview: On hold but action increasingly likely

We expect the BoJ to keep its 'QQE with yield curve control' policy unchanged at the next monetary policy meeting ending on Thursday, 19 September.

12/9 China Leading Indicators: Weakness but still not a hard landing

Our view. PMIs are set to remain weak in the short term with more downside especially in the Caixin PMI manufacturing.

9/9 Macro Strategy Views Podcast: Why ECB's policy easing would not help

In our weekly Macro Strategy Views podcast, we discuss the ECB's policy meeting later this week, in terms of what it is likely to do, what it implies for markets and whether it will actually succeed in lifting growth and inflation.

9/9 Brexit Monitor - Opposition unlikely to support snap election ahead of prorogation

PM Johnson tries to find ways to ignore the Brexit delay bill

8/9 Harr's view: Why ECB's policy easing would not help

The pass-through of a new cut in policy rates to bank deposit rates is likely to be limited, as Eurozone banks are either unwilling or unable (or both) to charge depositors.

Disclosures

This research report has been prepared by Danske Bank A/S ('Danske Bank'). The author of this research report is Piet Philip Haines Christiansen, Senior Analyst.

Analyst certification

Each research analyst responsible for the content of this research report certifies that the views expressed in the research report accurately reflect the research analyst's personal view about the financial instruments and issuers covered by the research report. Each responsible research analyst further certifies that no part of the compensation of the research analyst was, is or will be, directly or indirectly, related to the specific recommendations expressed in the research report.

Regulation

Danske Bank is authorised and subject to regulation by the Danish Financial Supervisory Authority and is subject to the rules and regulation of the relevant regulators in all other jurisdictions where it conducts business. Danske Bank is subject to limited regulation by the Financial Conduct Authority and the Prudential Regulation Authority (UK). Details on the extent of the regulation by the Financial Conduct Authority and the Prudential Regulation Authority are available from Danske Bank on request.

Danske Bank's research reports are prepared in accordance with the recommendations of the Danish Securities Dealers Association.

Conflicts of interest

Danske Bank has established procedures to prevent conflicts of interest and to ensure the provision of high-quality research based on research objectivity and independence. These procedures are documented in Danske Bank's research policies. Employees within Danske Bank's Research Departments have been instructed that any request that might impair the objectivity and independence of research shall be referred to Research Management and the Compliance Department. Danske Bank's Research Departments are organised independently from, and do not report to, other business areas within Danske Bank.

Research analysts are remunerated in part based on the overall profitability of Danske Bank, which includes investment banking revenues, but do not receive bonuses or other remuneration linked to specific corporate finance or debt capital transactions.

Financial models and/or methodology used in this research report

Calculations and presentations in this research report are based on standard econometric tools and methodology as well as publicly available statistics for each individual security, issuer and/or country. Documentation can be obtained from the authors on request.

Risk warning

Major risks connected with recommendations or opinions in this research report, including as sensitivity analysis of relevant assumptions, are stated throughout the text.

Date of first publication

See the front page of this research report for the date of first publication.

General disclaimer

This research report has been prepared by Danske Bank (a division of Danske Bank A/S). It is provided for informational purposes only. It does not constitute or form part of, and shall under no circumstances be considered as, an offer to sell or a solicitation of an offer to purchase or sell any relevant financial instruments (i.e. financial instruments mentioned herein or other financial instruments of any issuer mentioned herein and/or options, warrants, rights or other interests with respect to any such financial instruments) ('Relevant Financial Instruments').

The research report has been prepared independently and solely on the basis of publicly available information that Danske Bank considers to be reliable. While reasonable care has been taken to ensure that its contents are not untrue or misleading, no representation is made as to its accuracy or completeness and Danske Bank, its affiliates and subsidiaries accept no liability whatsoever for any direct or consequential loss, including without limitation any loss of profits, arising from reliance on this research report.

The opinions expressed herein are the opinions of the research analysts responsible for the research report and reflect their judgement as of the date hereof. These opinions are subject to change and Danske Bank does not undertake to notify any recipient of this research report of any such change nor of any other changes related to the information provided herein.

This research report is not intended for, and may not be redistributed to, retail customers in the United Kingdom or the United States.

This research report is protected by copyright and is intended solely for the designated addressee. It may not be reproduced or distributed, in whole or in part, by any recipient for any purpose without Danske Bank's prior written consent.

Disclaimer related to distribution in the United States

This research report was created by Danske Bank A/S and is distributed in the United States by Danske Markets Inc., a U.S. registered broker-dealer and subsidiary of Danske Bank A/A, pursuant to SEC Rule 15a-6 and related interpretations issued by the U.S. Securities and Exchange Commission. The research report is intended for distribution in the United States solely to 'U.S. institutional investors' as defined in SEC Rule 15a-6. Danske Markets Inc. accepts responsibility for this research report in connection with distribution in the United States solely to 'U.S. institutional investors'.

Danske Bank is not subject to U.S. rules with regard to the preparation of research reports and the independence of research analysts. In addition, the research analysts of Danske Bank who have prepared this research report are not registered or qualified as research analysts with the NYSE or FINRA but satisfy the applicable requirements of a non-U.S. jurisdiction.

Any U.S. investor recipient of this research report who wishes to purchase or sell any Relevant Financial Instrument may do so only by contacting Danske Markets Inc. directly and should be aware that investing in non-U.S. financial instruments may entail certain risks. Financial instruments of non-U.S. issuers may not be registered with the U.S. Securities and Exchange Commission and may not be subject to the reporting and auditing standards of the U.S. Securities and Exchange Commission.
