Weekly Focus

Still waiting for political clarity

Donald Trump's policy announcements continue to draw a lot of attention and create significant intra-day market moves but ultimately not clarity on economic policies and few lasting effects. This week, we had the announcement of so-called reciprocal tariffs where the US will base import tariffs on restrictions that US companies face on their export markets. That could imply large tariff hikes on for example goods from the EU, as the Trump administration seems to consider European VAT as equivalent to an import tariff, and the prospect initially weakened the EUR against USD. However, the actual announcement was vague with few details and the statement that countries might be able to avoid them, and markets ended in risk-on mode. As previously announced, the administration will examine the US trade deficit before 1 April, which also seems to be the deadline for the reciprocal tariffs.

The Trump administration also pushed for peace between Russia and Ukraine, leading to hopes that this could benefit the wider European economy but also concerns that the US would accept a stronger position for Russia that could pose risks for both Ukraine and EU countries in the longer run. Hence, it is not obvious that a peace agreement would open up for renewed large-scale energy export from Russia to the EU or would allow European countries to reduce their rearmament ambitions. There would be a need for rebuilding Ukraine which could benefit some European companies but also put further strains on public finances in EU countries.

On the data side, **US CPI inflation came out significantly higher than expected** at 0.4% m/m in January for the core measure, with the surprise being broad across categories especially within services. Together with the recent increase in household inflation expectations, this weakens the case for a Fed rate cut in March, although it should be noted that the January number may be distorted by one-off price adjustments. We still believe that rates should be cut significantly as monetary policy is restrictive, but the Fed has signalled that it is not in a hurry to do so, as the economy is broadly still quite strong. Also, Chinese inflation was higher than expected at 0.5% y/y in January against 0.1% y/y in December – so still low inflation, but moving up, and China could be less of a disinflationary force in the world economy going forward.

The most important data releases in the coming week are likely to be the PMIs for the major economies except China that are due on Friday, with US regional surveys coming in the days before. Especially in Europe, PMIs delivered some positive news in January as the decline in manufacturing seemed to slow. It will be interesting to see if we move further in that direction this month, supporting the view that the European economy is slowly being supported by rising real incomes and lower interest rates. There will also be plenty of attention still on politics, with talks about Ukraine currently ongoing at the Munich Security Conference and with the German election Sunday next week. We do not expect the election to make a large difference for the near-term economic outlook though, see *Research Germany - Limited economic impact from German election*, 6 February.

Key global views

- Outlook for slightly higher growth in Europe and China, slightly lower in the US
- Policy uncertainty has limited short-term effect
- The Fed and the ECB to cut further but at different paces

Key market movers

- Tuesday: German IFO
- Wednesday: China house prices, US construction data, FOMC minutes
- Thursday: Euro consumer confidence
- Friday: PMIs for most major economies
- Sunday: Election in Germany

Selected reading from Danske Bank

- US Labour Market Monitor Solid conditions despite revisions, 13 February
- Global Inflation Watch Tariff uncertainty blurs the outlook, 12 February

Scandi market movers

In Denmark, we receive <u>consumer confidence</u> data for February on Thursday. We expect confidence to rise to -11, which still indicates a negative view of the Danish economy among the Danes. However, we expect a slight increase as there has been a noticeable uptick in consumption, particularly in the retail sector. This is largely because more people in Denmark are experiencing wages rising faster than prices, gradually regaining lost purchasing power, which is now being reflected in consumer spending.

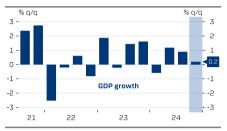

<u>GDP for Q4</u> is due on Thursday. According to the data we have now there was a small decline in industrial production, indications of a small increase in construction and of some growth within consumer services. All in all, we expect GDP growth of 0.2% q/q, but uncertainty is very large. Danish GDP numbers are very much affected by hard-to-measure activity abroad by Danish companies such as Novo Nordisk, and that makes the data both hard to predict and prone to large revisions. There was a very large increase in exports in Q4, but since it is not reflected in increasing production that seems to have been a price effect and hence not something that will drive up GDP in fixed prices.

On Friday we will receive the <u>business sentiment indicator</u> for February. Despite a decrease in sentiment in January, the outlook still pointed towards moderate progress in 2025, with a clear expectation of increased hiring. A notable aspect of the January data was the major setback in the retail industry, and it will be interesting to see if it recovers in February. Overall, we remain optimistic about the prospect of Danish economy and business activity.

On Friday, we also receive <u>payrolls data for December 2024</u>. This data has shown growth throughout 2024, and the business sentiment indicator suggest that this continues in December.

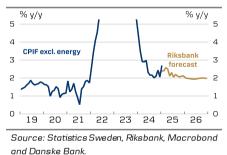

- In Sweden, the focus will be on the detailed <u>CPI report</u> for January out on Tuesday (08.00 CET). The flash inflation reading turned out much higher than we, the market and the Riksbank had expected. The big surprise was on underlying inflation, i.e. CPIF ex. energy, which could be a worrying sign of a broader inflation pressure. The details will bring important information on the implications for inflation throughout 2025 as well as the implications for the Riksbank. We also note the <u>Swedish Labour force</u> survey (Monday 08.00 CET) where we expect to see a stabilisation of the weak labour market situation but no improvement for unemployment.
- In Norway there are no market movers in the coming week.

Denmark: Expected 0.2% q/q growth amidst significant uncertainty

Source: Statistics Denmark, Macrobond, Danske Bank

Scandi Update

Denmark - Inflation decreased in line with expectations

January CPI fell to 1.5% from 1.9% in December, mainly due to electricity prices, where large increases in prices last January implies price declines now. The price of natural gas also contributed to the decrease. January inflation is notoriously uncertain, due to new weights certain prices that are only updated once a year, and uncertainty about the size of January sales. Nevertheless, inflation is well under control domestically, which is good news for consumers. Not only does it mean increased purchasing power, but it also strengthens the outlook for lower interest rates as inflation has also come down in the euro zone. We expect the ECB to continue lowering rates until after the summer holidays and anticipate that Nationalbanken will mirror the ECB's decisions.

In December, the total export of goods and services increased by 8.3% to DKK 193.7bn (SA), while total imports increased by 1.7% to DKK 147.9bn (SA). The increase in December is particularly evident in goods sold abroad after processing abroad. These are part of the trade in goods that do not cross the Danish border and where there are significant fluctuations in trade. Furthermore, an increase in the current account of DKK 50.7bn (SA) in December brought the total current account surplus for 2024 to DKK 410.3bn, an increase of 48.7% compared to 2023.

Sweden – Labour market steady amidst subdued housing activity

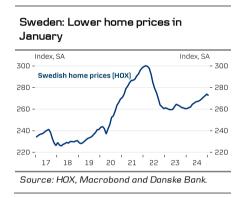

We leave a quiet week behind with no big data surprises. The Swedish Public Employment Services published its monthly report which showed that unemployment was unchanged (SA) and that layoffs remained at their historical average after the elevated levels in the early autumn. Swedish home prices according to HOX showed a smaller decline than other price indicators had shown for January. Nevertheless, the housing market took a pause in January with negative price developments and less transactions.

Norway - Lower growth, higher wage growth

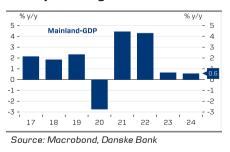

Mainland GDP surprisingly fell by 0.4% in Q4. Admittedly, some of this was due to technical factors, but in any case, mainland growth ended at 0.6% last year. This is well below trend growth, which is perhaps around 1.25-1.5%, and it is surprisingly weak considering how strong growth impulses have been from exogenous factors such as public demand and oil investments. This confirms our view that monetary policy is clearly restrictive with a policy rate of 4.5%. At the same time, the oil investment survey shows that after very strong growth in 2023 and 2024, there will be clearly more moderate growth this year and a fall in oil investments next year. When the most important growth driver turns around, it naturally opens up the possibility of stimulating the rate-sensitive parts of the economy through lower interest rates. A rate cut from Norges Bank in March is still most likely, and we keep our expectation of four cuts in 2025.

Norway: Anemic growth

Disclosures

This research report has been prepared by Danske Bank A/S ('Danske Bank').

Analyst certification

Each research analyst responsible for the content of this research report certifies that the views expressed in the research report accurately reflect the research analyst's personal view about the financial instruments and issues covered by the research report. Each responsible research analyst further certifies that no part of the compensation of the research analyst was, is or will be, directly or indirectly, related to the specific recommendations expressed in the research report.

Regulation

Danske Bank is authorised and regulated by the Danish Financial Services Authority (Finanstilsynet). Danske Bank is authorised by the Prudential Regulation Authority in the UK. Subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. Details about the extent of our regulation by the Prudential Regulation Authority are available from us on request.

Danske Bank's research reports are prepared in accordance with the recommendations of Capital Market Denmark.

Conflicts of interest

Danske Bank has established procedures to prevent conflicts of interest and to ensure the provision of high-quality research based on research objectivity and independence. These procedures are documented in Danske Bank's research policies. Employees within Danske Bank's Research Departments have been instructed that any request that might impair the objectivity and independence of research shall be referred to Research Management and the Compliance Department. Danske Bank's Research Departments are organised independently from, and do not report to, other business areas within Danske Bank.

Research analysts are remunerated in part based on the overall profitability of Danske Bank, which includes investment banking revenues, but do not receive bonuses or other remuneration linked to specific corporate finance or debt capital transactions.

Financial models and/or methodology used in this research report

Calculations and presentations in this research report are based on standard econometric tools and methodology as well as publicly available statistics for each individual security, issuer and/or country. Documentation can be obtained from the authors on request.

Risk warning

Major risks connected with recommendations or opinions in this research report, including as sensitivity analysis of relevant assumptions, are stated throughout the text.

Date of first publication

See the front page of this research report for the date of first publication.

General disclaimer

This research has been prepared by Danske Bank A/S. It is provided for informational purposes only and should not be considered investment, legal or tax advice. It does not constitute or form part of, and shall under no circumstances be considered as, an offer to sell or a solicitation of an offer to purchase or sell any relevant financial instruments (i.e. financial instruments mentioned herein or other financial instruments of any issuer mentioned herein and/or options, warrants, rights or other interests with respect to any such financial instruments) ('Relevant Financial Instruments').

This research report has been prepared independently and solely on the basis of publicly available information that Danske Bank A/S considers to be reliable but Danske Bank A/S has not independently verified the contents hereof. While reasonable care has been taken to ensure that its contents are not untrue or misleading, no representationor warranty, express or implied, is made as to, and no reliance should be placed on, the fairness, accuracy, completeness or reasonableness of the information, opinions and projections contained in this research report and Danske Bank A/S, its affiliates and subsidiaries accept no liability whatsoever for any direct or consequential loss, including without limitation any loss of profits, arising from reliance on this research report.

The opinions expressed herein are the opinions of the research analysts and reflect their opinion as of the date hereof. These opinions are subject to change and Danske Bank A/S does not undertake to notify any recipient of this research report of any such change nor of any other changes related to the information provided in this research report.

This research report is not intended for, and may not be redistributed to, retail customers in the United Kingdom (see separate disclaimer below) and retail customers in the European Economic Area as defined by Directive 2014/65/EU.

This research report is protected by copyright and is intended solely for the designated addressee. It may not be reproduced or distributed, in whole or in part, by any recipient for any purpose without Danske Bank A/S's prior written consent.

Disclaimer related to distribution in the United States

This research report was created by Danske Bank A/S and is distributed in the United States by Danske Markets Inc., a U.S. registered broker-dealer and subsidiary of Danske Bank A/S, pursuant to SEC Rule 15a-6 and related interpretations issued by the U.S. Securities and Exchange Commission. The research report is intended for distribution in the United States solely to 'U.S. institutional investors' as defined in SEC Rule 15a-6. Danske Markets Inc. accepts responsibility for this research report in connection with distribution in the United States solely to 'U.S. institutional investors'.

Danske Bank A/S is not subject to U.S. rules with regard to the preparation of research reports and the independence of research analysts. In addition, the research analysts of Danske Bank A/S who have prepared this research report are not registered or qualified as research analysts with the New York Stock Exchange or Financial Industry Regulatory Authority but satisfy the applicable requirements of a non-U.S. jurisdiction.

Any U.S. investor recipient of this research report who wishes to purchase or sell any Relevant Financial Instrument may do so only by contacting Danske Markets Inc. directly and should be aware that investing in non-U.S. financial instruments may entail certain risks. Financial instruments of non-U.S. issuers may not be registered with the U.S. Securities and Exchange Commission and may not be subject to the reporting and auditing standards of the U.S. Securities and Exchange Commission.

Disclaimer related to distribution in the United Kingdom

In the United Kingdom, this document is for distribution only to (I) persons who have professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the 'Order'); (II) high net worth entities falling within article 49(2)(a) to (d) of the Order; or (III) persons who are an elective professional client or a per se professional client under Chapter 3 of the FCA Conduct of Business Sourcebook (all such persons together being referred to as 'Relevant Persons'). In the United Kingdom, this document is directed only at Relevant Persons, and other persons should not act or rely on this document or any of its contents.

Disclaimer related to distribution in the European Economic Area

This document is being distributed to and is directed only at persons in member states of the European Economic Area ('EEA') who are 'Qualified Investors' within the meaning of Article 2(e) of the Prospectus Regulation (Regulation (EU) 2017/1129) ('Qualified Investors'). Any person in the EEA who receives this document willbe deemed to have represented and agreed that it is a Qualified Investor. Any such recipient will also be deemed to have represented and agreed that it has not received this document on behalf of persons in the EEA other than Qualified Investors or persons in the UK and member states (where equivalent legislation exists) for whom the investor has authority to make decisions on a wholly discretionary basis. Danske Bank A/S will rely on the truth and accuracy of the foregoing representations and agreements. Any person in the EEA who is not a Qualified Investor should not act or rely on this document or any of its contents.
